SUMMARY

Software Engineer with 1 year of industry experience building and supporting scalable systems across application and cloud environments. Strong in JavaScript, Node.js, React.js, and database-backed applications. Experienced in system reliability engineering, monitoring, log analysis, and incident resolution using Azure Monitor and Log Analytics. Proven ability to write production-grade code, debug complex issues, collaborate across teams, and deliver reliable software solutions.

EDUCATION

Haldia Institute of Technology

Bachelor of Technology in Electronics and Communication Engineering
CGPA: 8.25

Haldia, West Bengal
2020-2024

M.H.K. College

Higher Secondary Examination (Class XII)
Percentage: 70.6 (BSEB)

Motihari, Bihar
2019

Adarsh High School

Secondary Examination (Class X)
Percentage: 72.5 (BSEB)

Jagdishpur, Bihar
2017

SKILLS

Cloud & Monitoring:	Microsoft Azure, Azure Monitor, Log Analytics
Front-end:	JavaScript, React.js, HTML, CSS
Back-end:	Node.js, Express.js
Databases:	MySQL
Scripting & OS:	Shell Scripting, Linux, Windows
Version Control:	Git, GitHub
Tools:	Visual Studio Code, MS Office, Postman, Confluence
Others:	DSA, OOPs, Incident Management, ITIL
Languages:	English, Hindi

EXPERIENCE

Engineer - Cloud & Infra Management

Honeywell Lenel Support (CIS-FMB-Lenel Support)

Fab 2025 - Present
LTIMindtree

- Supported and monitored large-scale Physical Access Control Systems using Azure Monitor and Log Analytics to ensure high availability and system reliability.
- Performed incident triage, troubleshooting, and resolution for application and infrastructure issues, reducing downtime and mean time to recovery.
- Collaborated with development, security, and operations teams to improve system stability and compliance.
- Created and maintained technical documentation, SOPs, and operational workflows to standardize support processes.

PROJECTS

Digital Wallet (React JS, Node.js, Express.js, Tailwind CSS, MongoDB): Developed a full-stack digital payment system with user authentication, account management, and money transfer features. Implemented **JWT-based authentication**, real-time balance updates, and secure transactions with MongoDB sessions. Designed a responsive, user-friendly user interface for seamless navigation and functionality. ([GitHub](#))
